

VIDHAN RATHORE

Software Engineer - AI Backend Engineer - Python Developer

Hyderabad, India | rathorevidhan2001@gmail.com | +91-6232371031 | LinkedIn | GitHub

Professional Summary

I am an enthusiastic learner and software engineer with 3+ years of experience in Backend development, specializing in Python and AI-driven applications. Proven ability to develop scalable APIs, integrate LLMs for innovative solutions, and optimize performance under tight deadlines.

Technical Skills

- **Programming Languages:** Python, JavaScript, PHP.
- **Frameworks:** Flask, FastAPI.
- **AI/ML:** LLMs, Langchain, TensorFlow, spaCy, Generative AI.
- **IT Constructs:** SQL, PostgreSQL, System Design, Git.
- **Data Structures & Algorithms:** Strong problem-solving skills, solved 350+ problems across LeetCode & GeeksforGeeks.
- **Libraries:** Pandas, NumPy, Pydantic, Tesseract, EasyOCR, gTTS, PyPDF2.

Experience

Achievers | Software Engineer, ValueLabs 2025 – present

- **Mobile Push Notifications** – Implemented real-time mobile push notification functionality to instantly notify users about order status updates, improving user engagement and overall customer experience.
- **API Migration & Modernization** – Migrated core system APIs from **V2 to V5** in PHP, enhancing performance, strengthening security, and improving maintainability. Conducted thorough testing to ensure zero downtime during transition.
- **Award & Approval Center Enhancements** – Developed and optimized features for the Award & Approval Center, improving efficiency in managing nominations, approvals, and recognitions for enterprise users.
- **Introduced Leaderboard Concept** – Proposed and developed a proof-of-concept for a new leaderboard feature, adding functionality that was previously unavailable in the system.

WebMD | Software Engineer, ValueLabs 2023 – 2025

- **API Development & Optimization** – Designed, developed, and maintained robust APIs using **Python, FastAPI, and Flask**, ensuring scalability and performance.
- **Innovative AI Solutions** – Built and implemented cutting-edge solutions leveraging **LLMs and ChromaDB**, including:
 - Personalized bio Generation | Review summarization | False review detection | Prompt Guru
- **AI-Powered Developer Tools** – Contributed to the **Code Review** feature of a VS Code plugin, similar to GitHub Copilot, helping developers enhance productivity by **30%** with AI-driven suggestions.
- **Proof of Concepts (POCs)** – Led multiple POCs simultaneously, transforming complex client requirements into working prototypes. Awarded **Star of the Month** for delivering high-impact AI solutions.
- **Collaboration & Communication** – Created comprehensive documentation, recorded demo videos, and assisted teams with installation, showcasing **strong communication and teamwork skills**.

Education

Qualification	Institution	Details	Year
B.Tech in ECE	Samrat Ashok Technological Institute	CGPA: 8.78/10	2019–2023
Intermediate	The Oxford H.S. School, Sehore	Scored 90%	2018–2019

Personal Projects

Image Semantic Search App

Python, ChromaDB, Streamlit, Groq, LangChain

- Developed an image search engine for a personal dataset (~20 GB) that finds visually and contextually similar images.
- Added smart filters using metadata like location and time for more accurate searches.
- Delivered top-5 image matches in under one second.

Local News Summarizer

Python, LangChain, Groq, News APIs

- Built a tool that fetches real-time local news, summarizes it into concise points, and tags sentiment.
- Applied AI-driven summarization and sentiment analysis to improve news readability.
- Achieved over 90% accuracy in sentiment tagging during testing.

LinkedIn Post Generator for Content Creators

Python, ChromaDB, Groq, LangChain

- Created an AI tool to generate LinkedIn posts including captions, hashtags, and tone suggestions.
- Integrated semantic search to match the tone and style of previous content.
- Reduced content creation time from ~30 minutes to under 3 minutes.

Certification

- **Full Stack With Python** by Fynd Academy
- **Python: AI, Machine Learning, Data Science** by CodeBasics
- **ChatGPT Prompt Engineering for Developers** by DeepLearning.ai
- **Introduction to Generative AI** — Google Cloud (Coursera)
- **Google Cloud Computing Foundations Certificate** (Ongoing)

Extracurricular Activities

- Mentored around **50+ students** during my college.
- Conducted training and seminars for school students during COVID-19 pandemic.
- Passionate about strategy games such as chess and carrom, and an avid reader.
